

EM EAGLE 5" K-style Seamless Gutter Machine

Eastside's 5-inch K-style seamless gutter machine features 14 unique and fully driven forming stations that are enclosed with a clear cover to protect the operators and keep the roll-former free and clear of debris. All bearings are factory-sealed. The machine is driven by a powerful 3/4 HP, 110 volt single phase motor and is constructed of heavy gauge steel. The EM Eagle 5-inch K-style Seamless gutter machine is completely enclosed, yet easily serviceable, as the side panels are removable. It is powder-coated inside and out with a heavy-duty industrial paint finish for protection from the elements and features industrial nitrocarburized (QPQ) steel rollers. Nitrocarburizing rollers allow for improved wear, lubricity, strength and corrosion resistance.
